

Career and Technical Education Program Plans

As part of the program standards for Career and Technical Education as established by Federal Carl Perkins law and Washington's Office of Superintendent of Public Instruction, CTE programs are required to have a 1-5 year annual plan that is reviewed and approved by the General Advisory Council, and the Program Advisory Committees on an annual basis. Once approved by the Advisory Committees, the plans are to be submitted to the School Board and Superintendent for final approval. Approved plans are then submitted with the Annual Carl Perkins Grant application.

The attached plans are respectfully submitted to the Wenatchee School board for review and approval. Thank you for your time and leadership. We will both be available at the board meeting on May 22, 2018 to share information, and answer questions. Thank you for your time and leadership.

Sincerely,

Pete Jelsing, Director Of Wenatchee Valley Technical Skills Center
Dennis Conger, Director of Career and Technical Education.
